

# **PROJECT TITLE: OptiCrop: Smart Agricultural Production Optimization Engine**

## **1. COMPREHENSIVE FEATURES DEMONSTRATION VERIFICATION REPORT**

### **\* Feature Set A: Form Parameter Validation UI**

- Pass Status: SUCCESS. Standard HTML form fields successfully capture seven required macro and climate numbers without interface errors or system memory drops.

### **\* Feature Set B: Real-Time Vector Model Processing**

- Pass Status: SUCCESS. The input array connects instantly to models/crop\_model.pkl without lagging processing intervals.

### **\* Feature Set C: Dynamic Target Output Box Rendering**

- Pass Status: SUCCESS. Centered alert displays the recommended crop category cleanly right under the input button container row.
